

1. Which age group has the lowest percent of student loan debt?

DOK 1

2. Mortgage is an overwhelmingly large fraction of people's debt in every age group except \_\_\_\_\_.

DOK 1

3. You might assume that people pay off their debts as they get older. If that's true, why are each of these bars the same height?

DOK 2

4. Auto loan debt levels remain fairly consistent across all age groups. Hypothesize why that might be.

DOK 3

5. If a friend said, "College is a scam -- you'll be paying back student loans until the day you die," would you agree or disagree. Support your answer with data from this graph.

DOK 3
